Well done! You found a geocache and you have an invaluable treasure in your hands. You can steal it, but if you take it away you'll prevent other people to have fun finding it. Geocaching is a treasure hunting that's played all around the world where you can find many treasures like this one by using GPS coordinates. So, leave your sign on this logbook, we'd like it, and start hunting: www.geocaching.com

Build a mini logbook in 3 minutes!

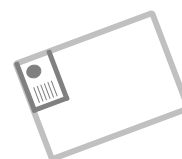

Follow the instructions and get a 30 writable pages logbook. You'll need a paper, a pair of scissors and a stapler. We suggest a laser printing, it won't drip with the humidity.

With a scale > 140% the output can be too big for some staplers or come out of the printing borders. The version with lines (pages 2, 3) requires double sided printing.

Have fun!

1

Cut along the dashed line. By modifying the printing scale you can change the logbook size.

2

Fold the paper in two parts along the long side. Repeat other 2 times. 3 foldings in total.

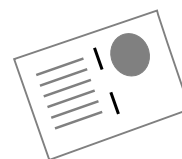

3

With the stapler put two staples. Make sure to center the two signs, in order to do it, help yourself using the line on the back side.

4

Cut the three grey borders. Don't fold before cutting.

5

Fold into two and get your logbook!
If you want you can finish off the cuttings.
Customize your logbook.
With large transparent duct tape you can coat the cover
